

2006 Graduate Destination Survey:

Faculty of Medicine

The 2006 Graduate Destination Survey captures information on the destination of University of Sydney graduates approximately 6 months after they complete their final year of study. Students may start full time or part time employment, continue studying or combine both activities. For many students, an undergraduate degree may be a first step towards postgraduate study while for others, further study may not be required to achieve their desired vocational outcome.

Prospective students or students currently studying may find the results of the Graduate Destination Survey useful as an indication of the numerous directions that graduates take after completing their undergraduate degree. While this survey obtains information about the start of graduate's career paths, it does not provide information on where they eventually find themselves in terms of life-long professions and objectives.

Please note that whilst completion of the graduate destination survey is encouraged, it is voluntary and the statistics do not represent the entire body of students graduating for that year.

Please click on the relevant degree to get more information about work status, median full time starting salaries, destination by industry and sector, occupation and employer and to see the top majors and directions of further education:

[Bachelor of Medicine/ Bachelor of Surgery](#)

Degree Code: KH006

For additional information on this report please contact the University of Sydney Careers Centre on (02) 9351 3481, via email at info@careers.usyd.edu.au or visit our website at www.careers.usyd.edu.au
